

NHS NET ZERO / SUSTAINABILITY

Practical Company Case Studies

You will be aware of the NHS's Net Zero targets to support the global challenge of climate change

During this webinar you can hear from small to medium sized companies that are making progress in navigating the sustainability journey - both to meet the NHS Net Zero requirements, and more importantly, while doing so, reduce costs, enhance efficiency, improve employee morale, and drive business growth.

We won't baffle you with jargon, flow diagrams or statistics but give you insightful and practical 'take away' tips for application in your own organisation.
